

## WHAT IS A TANDEM SKYDIVE?

If you decide to undertake a tandem skydive you will initially participate in a ground-training programme of approximately 20 minutes. This is followed by a 15-minute climb in one of the turbine aircraft to an altitude of approximately 15,000ft, followed by approximately 45 seconds in freefall and a five-minute canopy ride. Throughout the whole skydive you are attached to your instructor by a harness.

## WHEN CAN I JUMP?

As soon as you have returned your Reservation Form, Tandem Parachuting Declaration Form and Declaration of Fitness Form complete with booking deposit of £50 we will provide you with all the relevant information concerning your jump and the date.

## WHERE ARE THE AIRFIELDS?

There are 25 centres across the United Kingdom; directions will follow with your jump conformation.

## WHAT CAN I EXPECT ON THE DAY?

You will arrive at your local drop zone about 08.30 where you will pay the drop zone the outstanding balance for your jump, £200 cash. You will then be asked to complete a British Parachute Association Membership Form and you will have a short presentation by your instructors on what you can expect. You will then undergo your training which is about 20 minutes.

We sincerely hope that you decide to take the plunge! It is a thrilling “once in a lifetime” experience.

There will be many other people trying parachuting for the first time on the day and you are welcome to bring along some friends so that they can watch you on the day.

**A day you will simply never forget!**
